#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) Responsive to communication(s) filed on \_\_\_\_\_.  
 2a) This action is **FINAL**.                    2b) This action is non-final.  
 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## DETAILED ACTION

### ***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-6 and 9-14, drawn to a process for manufacturing a solar cell foil.

Group II, claim(s) 7 and 8, drawn to a solar cell unit.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the common technical feature in all groups is structural limitations of the solar cell unit made by process of group I. This element cannot be a special technical feature under PCT rule 13.2 because the element is shown in the prior art. WO 98/13882 A to teaches such a solar cell unit (claims 1, 11; Figures 1-1 3; page 9, lines 10-1 1; page 11, line 18-page 17, line 2).

3. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- Species A which requires the etch resist to be a permanent etch resist (see [0146-0147] of Publication of instant Application) (claims 3, 4, 9, 12 and 13), and

Art Unit: 1795

- Species B which requires the etch resist to be a temporary etch resist (see [0146-0147] of Publication of instant Application) (claims 5, 10 and 14).

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

4. The claims are deemed to correspond to the species listed above in the following manner:

Species A which requires the etch resist to be a permanent etch resist (see [0146-0147] of Publication of instant Application), and Species B which requires the etch resist to be a temporary etch resist (see [0146-0147] of Publication of instant Application).

The following claim(s) are generic: claim 1.

5. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: the common technical feature in all species is an etch resist. This element cannot be a special technical feature under PCT rule 13.2 because the element is shown in the prior art. US 5637510 in fig. 1 and col. 4, lines 20-35.

Art Unit: 1795

6. A telephone call was made to James E. Armstrong, IV on 06/03/2009 to request an oral election to the above restriction requirement, but did not result in an election being made.
